Our Beliefs

We at Artize believe that the die making industry has an opportunity to partner the packing firms in improving their conversion process, through continuous Innovation in die making that will help:

- Reducing set-up times
- Improve run speeds
- Reduced wastage
- Automate the waste stripping process
- Reduce operator fatigue

Our Team

- Designers
- Engineers
- Quality Analysts
- Machine Operators
- Administrative Staff
- Sales & Marketing Experts

Our Goals

Taking our beliefs into consideration, the team of Artize pledges to achieve the following goals in the upcoming years:

1. To become the most preferable Die Cutting Solution provider in the industry
2. To provide high quality Die Cutting Tools & Solutions on par with international suppliers
3. To set a benchmark in the entire South Asia industry

Our Value Propositions

1. One-stop solution for all die-cutting requirements
2. Machinery with contemporary technology
3. Wide range of products
4. Optimized die cutting and post press tooling at competitive price

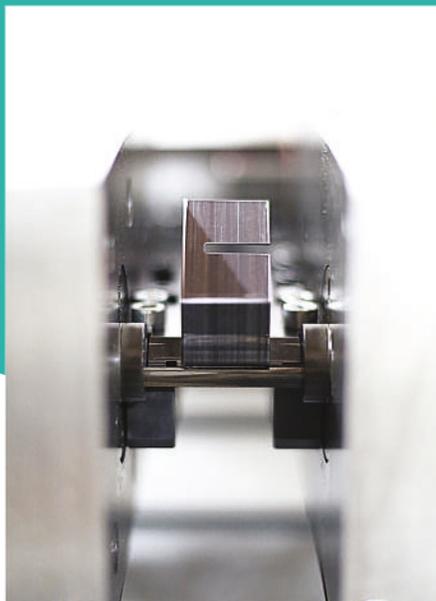

Our Infrastructure

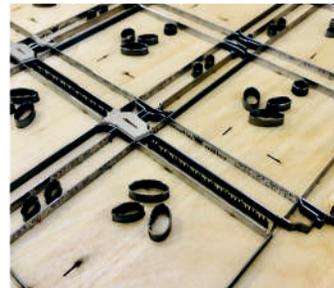

- Well equipped factory in New Delhi Region and Vapi, Gujarat.
- Top of the line laser cutting machine with pulse cutting option
- Back-up for all the manufacturing process.
- Pertinex and rubber cutting machine with counter steel plate milling attachment.
- Block engraving & Etching machine.

QUALITY
INSPECTION
SYSTEM

- We make high quality dies for producing die cut cartons for packaging industry which are used in various industries including FMCG, Pharmaceutical, Cigrattes and others.
- Dies made by Artize can be used on both automatic die cutting machine and manual die cutting machine.
- We also provide die for Cartonator Automatic Filling Machine and folder gluer machine.

**BOX
DIE**

- We manufacture flat bed label cutting dies.
- Label dies range from 8mm to 24mm rule height.
- These can be used to cut labels in roll and sheet form.

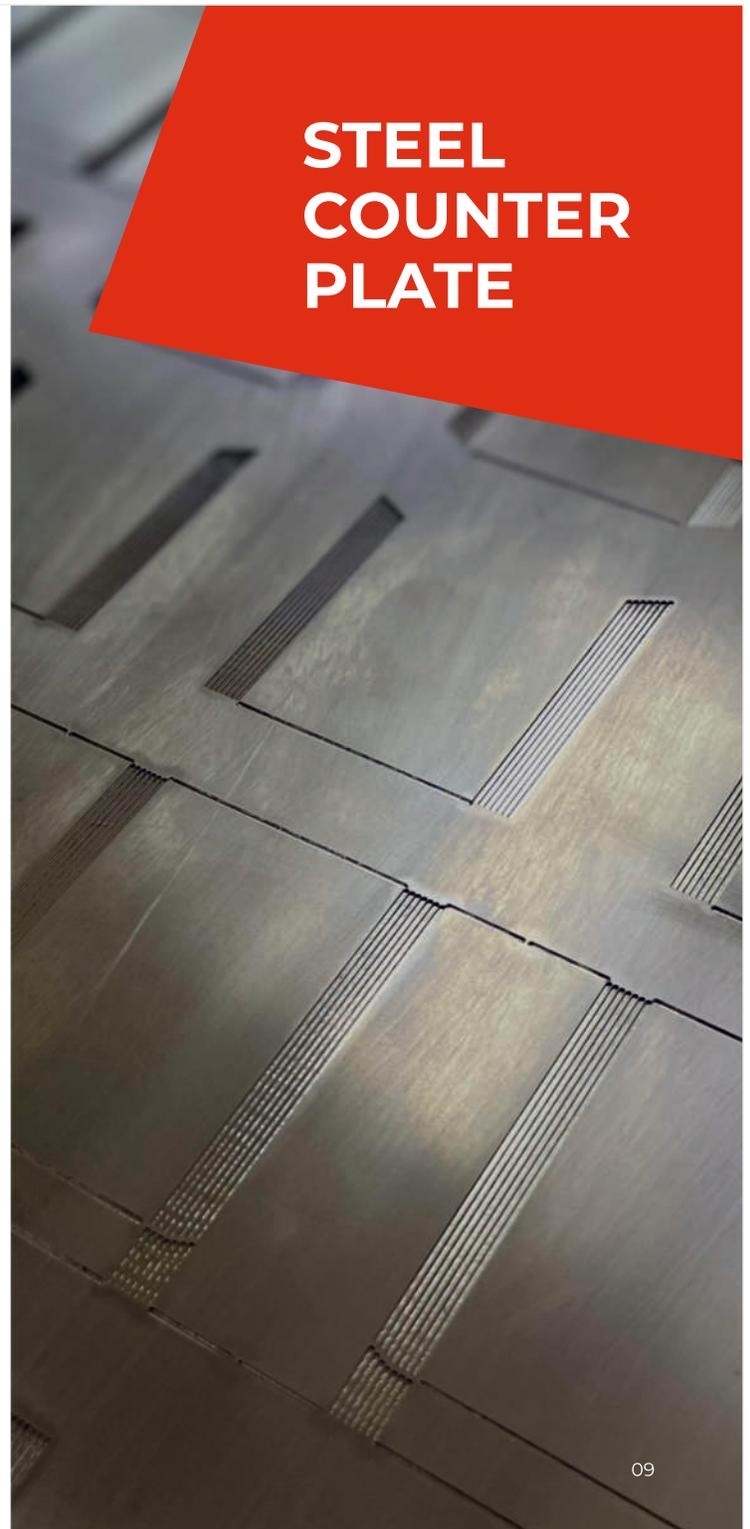

LABEL DIE

PERTINEX COUNTER PLATE

- Suitable for medium/long run jobs.
- Life of Pertinex counter is more than 5 lakh impressions.
- It only takes few minutes to setup.
- Premium creasing quality.
- 10 times better hold on the plate.
- Helps reduces rough cutting of cartons.

- Best quality creasing channel with perfect dimensional accuracy.
- Zero make ready time for creasing.
- Consistent quality in creasing from first sheet till the last sheet.
- Higher initial investment but turns out to be more beneficial later.

It is the best choice for long run jobs.

- We use best quality japanese material for Screen Guard Dies.
- We make Screen Guard Dies which are highly accurate, precise with best quality knives to get sharp and clean cuttinf of the screen.

SCREEN GUARD DIE

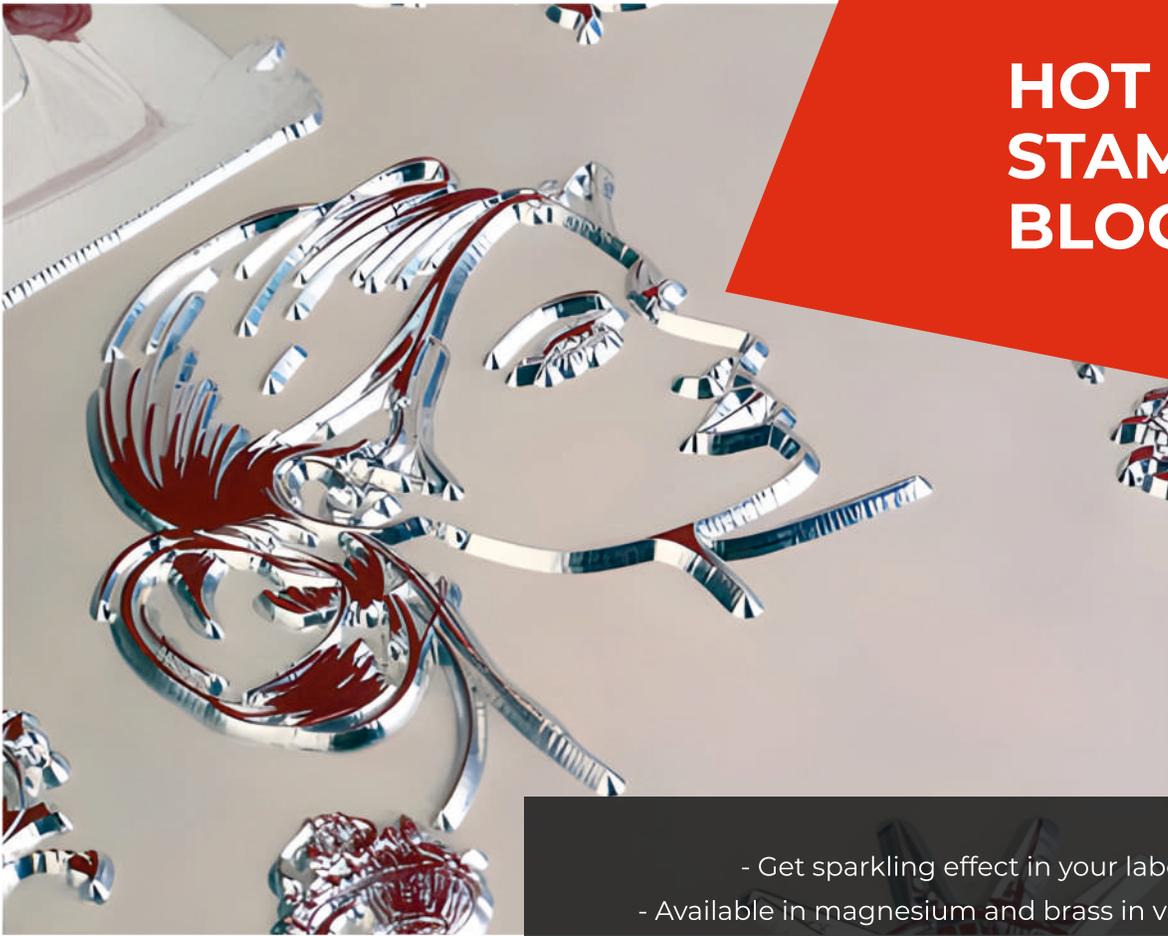

Smooth running rotary dies with minimum setup times, clean cuts and with online stripping of corrugated cartons.

**ROTARY
DIE**

PRE RUBBERISED DIE

- Increases efficiency of the cutting die.
- Using three different types of rubbers in same die increases the cutting quality.
- 90% reduction of setup time on the machine.
- Helps in producing dust free cutting (no angel hair).

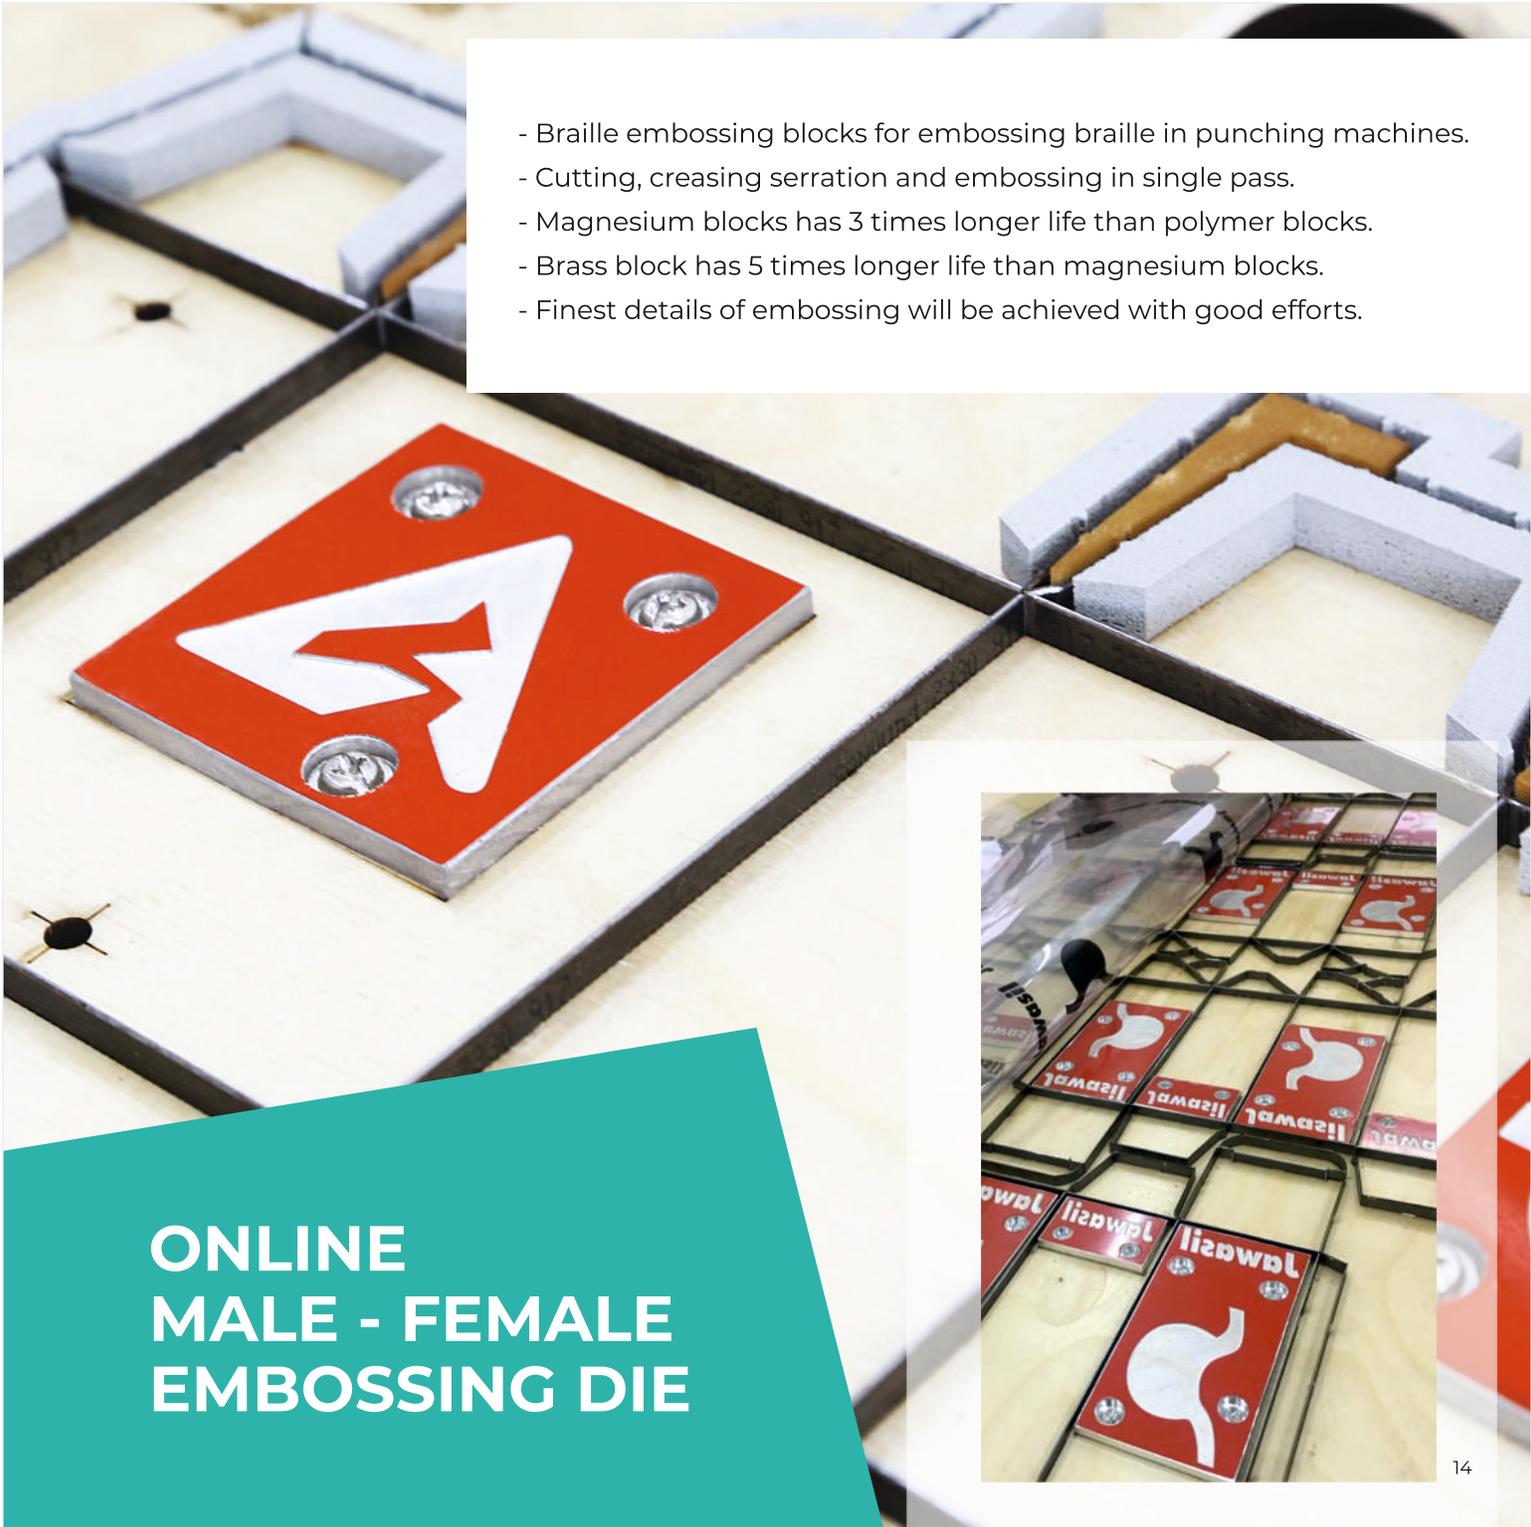

HOT FOIL STAMPING BLOCK

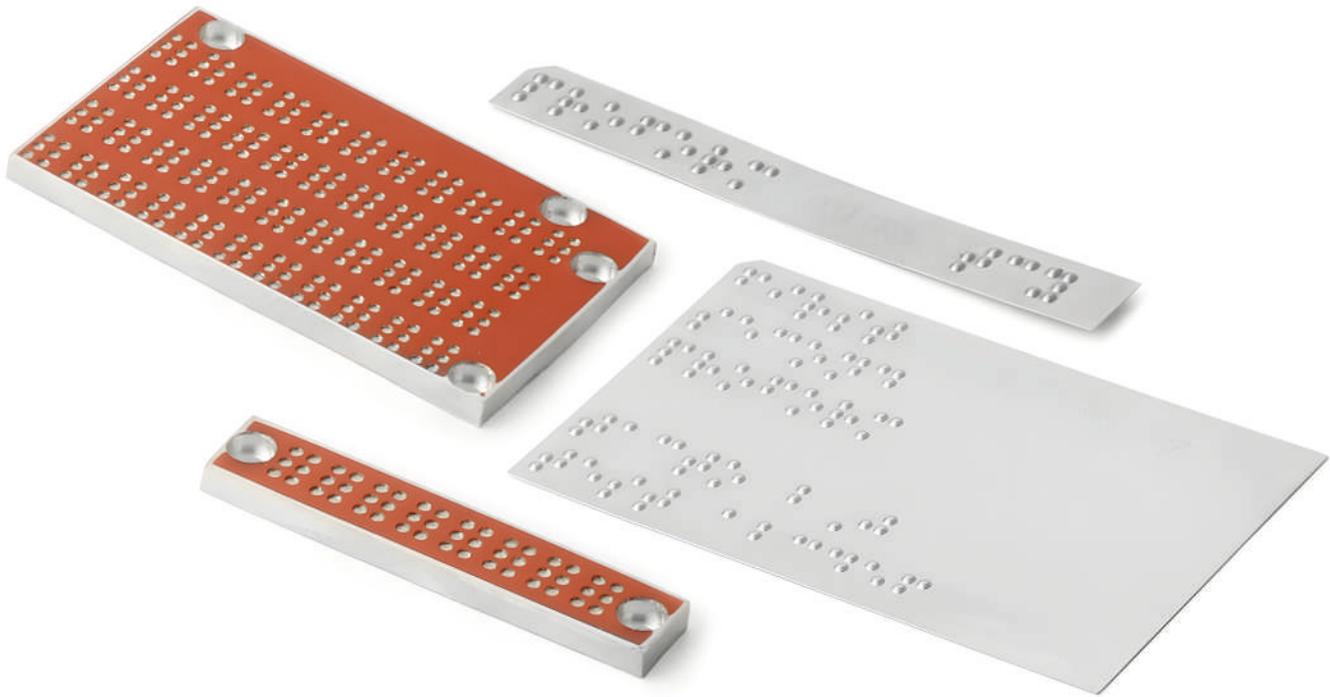

- Get sparkling effect in your label and cartons box.
- Available in magnesium and brass in various thicknesses.
- We use world's best quality material & fastest technology.

- Braille embossing blocks for embossing braille in punching machines.
- Cutting, creasing serration and embossing in single pass.
- Magnesium blocks has 3 times longer life than polymer blocks.
- Brass block has 5 times longer life than magnesium blocks.
- Finest details of embossing will be achieved with good efforts.

**ONLINE
MALE - FEMALE
EMBOSSING DIE**

- Braille is used on folding cartons.
- We follow certain standards of braille, which are recommended (IADD).
- Accubraille is installed on bobst folder gluer machine.
- It gives ability to emboss braille onto all four panels of the carton, even across the running direction.

**BRaille /
ACCUBRAILLE**

MALE - FEMALE STRIPPING DIE

- It is the quickest and the most cost effective way to strip.
- Clears the bottleneck process of manual stripping.
- Dedicated dynamics stripping dies.
- Reduces setup time and increases productivity clears critical wastes easily at higher production speeds.

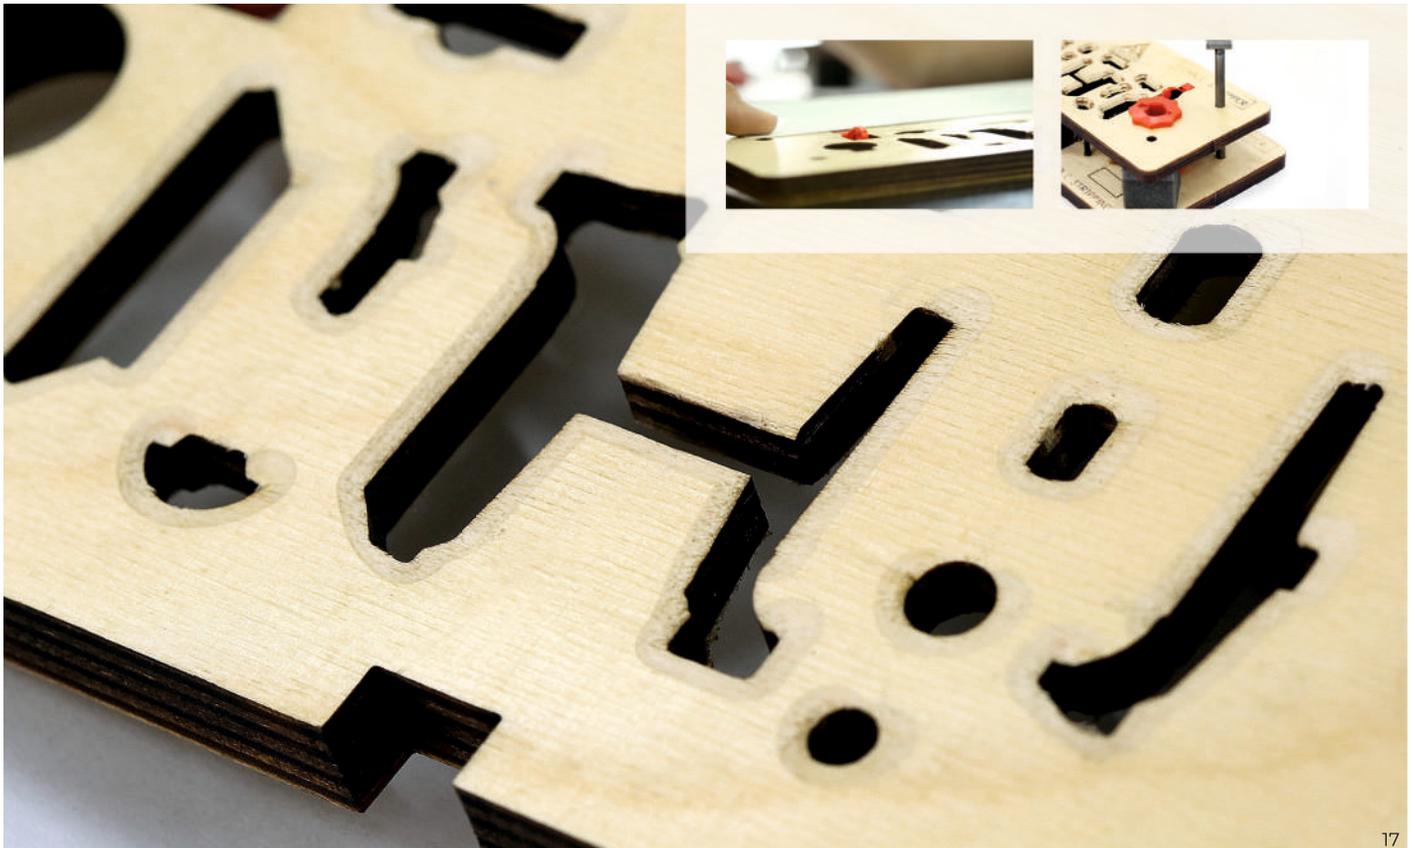

- Layout of the job, ruberring of the die, position of the nicks are the very important factors for stripping.
- Useful for long run repetitive jobs.

REVERSE CHAMFERING & SPECIAL FEATURES

- Used to avoid Jamming of the waste into middle stripping board.
- Sheet lifter placed all across the lower stripping tool ensures that the sheet travels at a platform.
- Match-ize help reducing the setup time on the machine.

Sheet Lifter

Match-ize

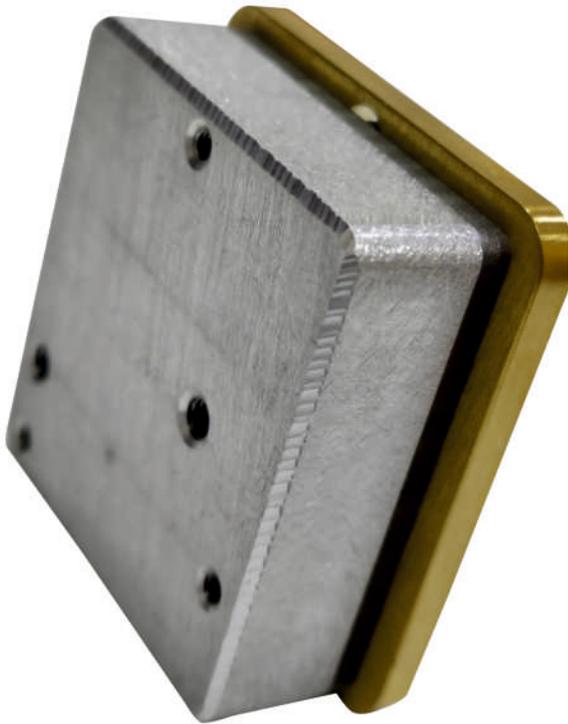

in partnership with

EASY FIX PLATE

- 2mm plate to fix the embossing blocks.
- Same plate to be used for repeat jobs.
- Zero make ready time for repeat jobs.
- Special blocks for foiling and embossing in one pass with perfect registration and quality throughout production.
- Saves lot of time for repeat jobs thereby increasing productivity.

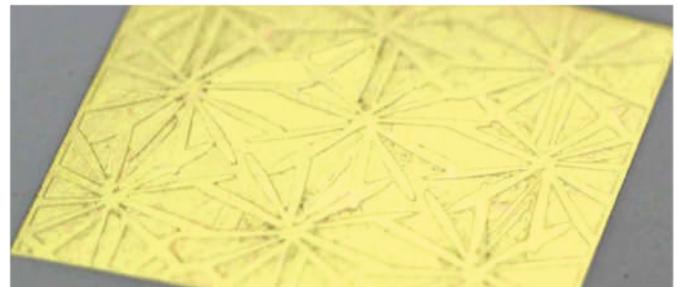

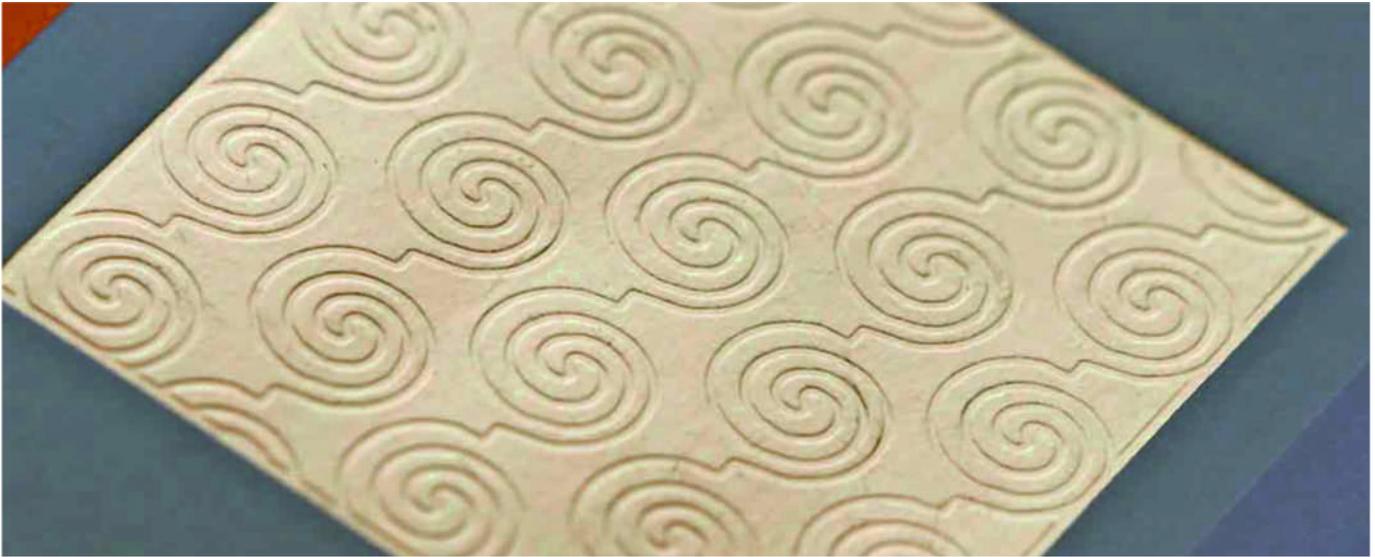

- Avoids die getting uneven for cutting, creasing and embossing pressure.
- Eliminates the compression of woods after certain pressure.
- Saves lot of time spend on achieving correct pressure for embossing and punching.
- Ensuring best productivity, life of die and quality in production.

ALUMINIUM BASE

TEXTURED LEAFING BLOCK

- Textured leafing block is used for adding texture in your packaging.
- No change in your machine or foil just replace the block to get the texture effect.
